PROFILE SUMMARY

Versatile junior software developer with a diverse technical foundation in C# and .NET Framework. Previously trained in cybersecurity, I bring a security-first mindset to modern software development. While I've since shifted focus from cybersecurity to application development, I am now actively building toward a long-term career in game development. I thrive in cross-functional environments and enjoy turning complex problems into engaging digital solutions.

PROJECTS

SwiftEdit:

- SwiftEdit is a lightweight, minimalist text editor collaboratively developed to provide core functions like editing, saving, opening files, and basic formatting. Designed with students, programmers, and writers in mind, it offers a fast, efficient, and distraction-free environment – all without the steep learning curve of traditional software.
- Tech Stack:** C#, .NET, WinForms.
- GitHub Repo Link:** [SwiftEdit](#)

MedAI:

- Med-AI is a sleek web app worked that scans your symptoms from text and predicts possible diseases in a flash. Focuses on numeric data input to provide personalized insights and recommendations for improved health outcomes.
- Tech Stack:** React.js, Python, BERT, TypeScript.
- GitHub Repo Link:** [MedAI](#)
