PROFILE SUMMARY

Computer Applications graduate with a strong foundation in C#, C++, and object-oriented programming. Hands-on experience developing software applications using .NET technologies and Unity. Currently focused on backend development with ASP.NET Core, RESTful APIs, and relational databases. Familiar with Git, Linux, debugging, and software development practices, with an interest in building scalable and maintainable applications.

PROJECTS

Procedural Maze System Development | Unity, C#

- Developed a procedural maze generation system using object-oriented programming principles.
- Implemented dynamic path creation and interactive player navigation mechanics.
- Designed modular architecture to improve maintainability and scalability.
- Applied software engineering practices for clean code organization and reusability.
- **GitHub Repository:** Project Maze V1

Grid-Based Pathfinding & AI Simulation System | Unity, C#

- Built a grid-based movement system with obstacle management and navigation logic.
- Implemented Breadth-First Search (BFS) pathfinding for intelligent route generation.
- Developed responsive AI behavior and tactical movement mechanics.
- Created custom editor tools to streamline environment setup and testing.
- **GitHub Repository:** Grid-Based AI Simulation

GameStore – Full-Stack Game Catalog Management | ASP.NET Core, Angular, C#

- Developed a full-stack game catalog management application using ASP.NET Core Minimal APIs and Angular.
- Designed RESTful API endpoints using route groups and DTOs to handle CRUD operations.
- Integrated Entity Framework Core with SQLite for data persistence and automatic database migrations.
- Implemented input validation, duplicate genre checks, and deletion constraints to maintain data integrity.
- **GitHub Repository:** GameProject_FullStack

SKILLS

- **Programming Languages:** C#, C++, C, Python
- **Backend Development:** ASP.NET Core, Minimal APIs, RESTful APIs, Entity Framework Core
- **Databases:** SQLite, PostgreSQL
- **AI-Assisted Development:** Antigravity, GitHub Copilot
- **Core Concepts:** Object-Oriented Programming, Data Structures & Algorithms, Debugging, Software Engineering
- **Tools & Platforms:** Git, GitHub, Linux, Visual Studio, JetBrains Rider, Unity

EDUCATION

Bachelors of Computer Applications | CGPA: 7.01
KLS Gogte College of Commerce, Belgaum | 2022 - 2025

Pre - University | Percentage: 85%
Rani Parvati Devi College, Belgaum | 2020 - 2022

ACHIEVEMENTS & CERTIFICATIONS

Achievements:

- **Winner:** 2x Inter-College Technical Events
- **Runner-up:** 3x Tech Competitions(In-house and External)
- 3rd Best Article Award
- 8th Rank in Commerce Major

Certifications:

- Unity Junior Programmer
- Cisco's Python Essentials 1
- Cisco's Computer Hardware Basics

LANGUAGES

English(Fluent), **Hindi**(Native), **Kannada & Marathi**(Conversational), **German & Finnish**(Elementary)
